

Crutches for Kids

INDESmed Children's Crutches

Aluminium Coloured Elbow Crutches

INDESmed Children's Crutches

INDESmed children's crutches are lightweight, adjustable and keep the natural position of the child's wrist avoiding tendonitis.

Smart crutches regulation system, thanks to the curved and oval shape allows a perfect regulation and anatomic adaptation during child's growing.

Continuous regulation of the handgrip allows accurate height adjusting avoiding the child on crutches discomfort..

Handgrip covers are made of soft medical grade silicone.

INDESmed crutches are silent, with no clicks when walking.

Made of sturdy aluminum, tested according to EEC norms, INDESmed children's crutches are available in 4 amazing colors for the tube and can be combined with 4 colours for the handle and rubber ferrule.

Child size crutches

How do I choose the correct sizing for my kid crutches?

Every child's forearm crutch is fully adjustable simply moving the cuff and handgrip along the curved area.
